

Product Code	Model	Internal dimensions (φ×H mm)	External dimensions (W×D×H mm)	Power supply
221512	CF301	-	228×508×546mm	AC220V 4A Single-phase with step down transformer
221563	CF321P	-	500×400×600mm	AC220V 4A Single-phase with step down transformer
221527	CF800	-	350×480×1240mm	AC220V 7A Single-phase with step down transformer
221579	CF800P	φ300×235mm	350×480×1007mm	220V 7A Single-phase with step down transformer
221552	CF820	-	570×440×600mm	AC220V 5A 50/60Hz, single phase with step-down transformer

Product Summary

Closed system and water saving with excellent cooling capacity

Features of Cooling Water Circulator (Externally-closed Circulation)

***Discontinued (CF301)**

Features

Environment friendly coolant used for refrigeration.

Features

Waterproof touch panel with big LED display and sheet key for easier setting.

Features

Less energy use and less cooling capacity loss by fixing the heat-resistant lid.

Features

Powerful cooling and big energy saver in combination with Rotary Evaporator distillation.

Features

When using CF800/810 up to 4 Rotary Evaporators can be connected saving investment and operation cost.
